

Abdulhadi Darwish

Personal and Contact Information

Date of Birth - Location	01.01.1996 - Damascus, Syria
LinkedIn	https://www.linkedin.com/in/%D9%90abdulhadi-darwish-3811b8a3/
E-mail	abdulhadidarwish9@gmail.com
Mobile	+963993517079

Education and Training

2021-2023 Syrian Virtual University	Master in Web Science at Syrian Virtual University
2014-2019 Damascus University	Faculty of Information Technology Engineering at Damascus University Department of Artificial Intelligence

Seminars and Courses

Completed over 10 relevant courses on Coursera, with a focus on data mining, text analysis, NLP, machine learning, deep learning, and data science. These courses have provided me with a strong foundation in industry-standard tools and techniques, allowing me to apply data-driven insights to solve complex business problems.

- Machine Learning - Andrew (11 weeks)
- Data Mining
- Architecting with Google Kubernetes Engine
- Applied Social Network Analysis in Python
- Text Mining and Analytics, Data Visualization
- Text Retrieval and Search Engines
- Applied Text Mining in Python
- Deep Learning: deeplearning.ai specialization (5 courses)
- Recommendation Systems
- Natural Language Processing specialization. (on going)

Summary

Profession

As a Computer Scientist, I possess diverse skills and experience in various fields, including machine learning, web development, blockchain, and forex trading. Throughout my career, I have demonstrated a deep understanding of these fields and have completed several projects that have enabled me to hone my skills further.

My expertise in machine learning has allowed me to design and implement appropriate ML algorithms and tools, troubleshoot, debug, and upgrade existing software, and produce clean, efficient code based on specifications. Additionally, I have worked on various web development projects, which have enabled me to develop my skills further.

I am also knowledgeable in blockchain, specifically in web3.js and MetaMask. My experience in this field has allowed me to understand the ins and outs of blockchain technology and how it can be used to develop innovative solutions.

My experience in forex trading has enabled me to understand the importance of data-driven insights and how they can be used to make informed decisions.

My passion for teaching and sharing knowledge has enabled me to develop my communication and teamwork skills, making me an ideal candidate for roles that require strong communication and leadership skills.

I am always looking for opportunities to solve problems and convert solutions into real businesses.

Work Experience

2020–Present
AI and Machine Learning
Engineer Instructor:
udemy.com
educative.io

- I have been working as an Instructor on Udemy.com
- I have taught courses in Artificial Intelligence and NLP for more than 14000 students from 100+ countries all over the world.

2021 - Present
Project Manager at OSH Groups

- Successfully managed multiple projects simultaneously.
- Developed and managed project plans, timelines, and budgets, ensuring on-time delivery and within budget constraints.
- Effectively communicated project status and progress to stakeholders, including executives, clients, and team members.

04/2019-06/2020

Machine Learning Engineer at:
Devzyer

- Design machine learning systems
- Research and implement appropriate ML algorithms and tools
- Work with developers to design algorithms and flowcharts
- Produce clean, efficient code based on specifications
- Integrate software components and third-party programs
- Verify and deploy programs and systems
- Troubleshoot, debug and upgrade existing software
- Extend existing ML libraries and frameworks

2016–2019

AlHashemiah High School

Coach at the International Olympiad in Informatics at AlHashemiah High School in Bab Toma - Damascus

Projects and Mindset

With these projects you will know more about my mindset

1. Like any other developer

- Developing Crypto coin "Kuro" with more than 10,000 holders (Laravel + Blockchain technologies)
- E-commerce (Laravel)
- Portfolio (Laravel + Vue.js)
- Blog (Laravel + Vue.js)
- Android Native apps using Java and Android Studio

2. Looking for Solving developer's problems and convert the solution to a real business

- "AutoLara" project for automating some tasks in Laravel and speeding up the development process.
- Generate source code from natural text using semantic search, this project is a real business and has real customers. Not just a prototype.

3. I am open to any new domain!

- Forex and Crypto Advisor: A bot Trading using Python, Math, Machine Learning, and Data Mining.
- Machine Learning for Stock Trading (Read data from API, save data to MongoDB, training ML model)

4. Helping people with making decisions using AI technologies

- Data Mining: Analyze and mine a large Yelp review dataset to discover useful knowledge to help people make decisions in dining.

Skills

Technical skills

- Machine Learning and Data Science libraries with Python and learning cloud technologies.
- Programming Languages: Python, PHP, C#, Java, C++.
- Web Development: Html, CSS, javascript, Laravel PHP, Vue.
- Blockchain: Web3.js, MetaMask
- Mobile Development: Android native.

Communication and teamwork skills

- Good communication and teamwork skills gained through my experience as a teacher and as a machine learning engineer.
- Risk management, problem-solving, time management, and leadership gained through my experience as a project manager.

Languages

- English: Intermediate level (2B).
